## SUMMARY

Software Engineer with 4 years of experience in implementing automation projects. Also worked as a consultant to implement Cash Application Automation. Being a logical thinker who prioritizes real-world applications over textbook approaches to problem-solving, I have adopted fail-first and fix-fast approach as a personality trait. Outside of work, I do stand-up comedy to keep following my passion. I am always seeking for new adventures, driven by my wanderlust and a knack for discovering and indulging in good food.

## WORK EXPERIENCE

### FREELANCE SOFTWARE ENGINEER
#### (09/2024 - Present)

**Coffee Developement Trust, Koraput ● Flutter Developer**
09/2024 - Present
- Built Coffee Mapper android application (currently published in Google Play Store) and a corresponding dashboard website to track and manage coffee plantations in the district of Koraput, Odisha.

**Kunsquad, Yamabuki & Babyligence ● Shopify Developer**
02/2025 - 04/2025
- Developed multiple pages, custom assets and widgets using Shopify Liquid for these startups based out of Bhubaneswar.

**Nothing But Comedy ● Apps Script and Twilio Developer**
08/2024 - 12/2024
- Created a Whatsapp bot based on Twilio and Apps Script to manage spot curation of a comedy club in Bangalore.

### AXELERANT TECHNOLOGIES
#### (07/2023 - 08/2024)

**Business Automation Engineer**
07/2023 - 08/2024
- Worked with internal teams to develop multiple automation scenarios for existing manual business processes in the company using primary tech stack for automation using tools and platforms like Make, Zapier, Apps Script, Zoho Automations, etc.
- Developed end to end automation scenario for employee onboarding, appraisal and offboarding systems. Maintained new automations and worked to improve existing automations for optimizations and cost efficiency.

### HIGHRADIUS CORPORATION
#### (05/2020 - 06/2023)

**Script Automation Team Lead**
07/2022 - 06/2023
- Moved to the technical development team in lieu of my SQL skills. Started building automation tools using apps script.
- Built various tools based on Apps Script Automation Projects *(a.k.a. ASAP)* to automate day to day work of a consultant which was implemented and currently in use by the company.
- The tools are used for managing projects, managing teams and faster data gathering process.

**Cash Application Automation Consultant and Co-Op Internship**
05/2020 – 07/2022
- Received PPO by the company to remain as a FTE after training on Cash Application Automation(CAA) during co-op internship.
- Started working with Bank of America clients to provide faster Cash Automation project implementations.
- Implemented CAA projects for my clients, Zurich Insurance, CrediQ and Heritage Crystal Clean which went live in 2021 and 2022.
- Managed 2 resources to implement CAA projects for our client Bureau Veritas which went live in 2022.

| 7.90 | 8.0 | 306.5 |

# PROJECTS

**Coffee Mapper**, Flutter Android App Project ⬈
- An android app built for the Coffee Developement Trust, Koraput.
- This app will be used by field agents to login and track coffee plantations in various regions of Koraput district and fill specific region details as well.

**Yamabuki Website**, Wordpress Project ⬈
- Built few custom widget assets for the Wordpress ecommerce site..

**Nothing BOT Comedy**, Whatsapp Bot Project ⬈
- A Whatsapp bot developed for managing spot curation of a comedy club at Bangalore. Comics can talk to the bot and ask for a spot.
- The bot gathered a user base of more than 150 comics who were using the bot to check for a spot at the venue on a weekly basis.

**ASAP - TL**, Apps Script Project ⬈
- Short for Apps Script Automation Projects – Task List.
- This tool is used by the team lead to manage a team's daily tasks which will need to be logged onto a google sheet with an ETA. The tool then follows up with the assigned person in Google Chats if the task is not completed past the deadline.

**ASAP - CG**, Apps Script Project ⬈ ⬈
- Short for Apps Script Automation Projects – Customer Grouping, this tool recommend a potential list of customers groups(similar sounding customer names belong to a group).

**Coffee Mapper Dashboard**, Flutter Web Project ⬈ ⬈
- A web dashboard used to display the tracked regions of various plantations along with an integrated map view to show regions and for admins to generate reports of tracked regions.

**Kunsquad Website**, Shopify Liquid Project ⬈
- Developed few pages and custom widget assets using Shopify liquid.

**Babyligence Website**, Shopify Liquid Project ⬈
- Created few custom widget assets using Shopify liquid from Figma .

**Automation Scripts**, Make Automation Project ⬈
- Made a few automation scripts using the platform of make.com to automate my daily tasks and other interactive bots.

**DSC KIIT**, Android App ⬈
- An app made completely on flutter to operate for all internalized work of DSCKIIT.

**Ms. BOOKERS'**, Actions on Google ⬈
- A complete e-commerce presence of the book rental startup BOOKERS' in an Action on Google tech-stack.
- The product was sold along with its associated user-base to a new market player looking to establish their service.

**Miss Lily**, Actions on Google ⬈
- Miss Lily is your personal health-mate. She is here to assist you to lead a healthy life, help you to fight with the diseases and schedule your medicines.
